

PIE TO BEGIN NEW ZEALAND ROLLOUT

pieNETWORKS Limited (“pie”) will begin the deployment of its own Webphone network in New Zealand after signing a Heads of Agreement with iStation Limited (www.istation.co.nz).

Under the agreement, pie will begin by replacing 2 of iStation’s 56 tourist information kiosks with its Hotspot Webphones.

iStation’s kiosk network is deployed across New Zealand in high traffic tourist locations. Webphones deployed as part of the agreement will provide free access to iStations’ website and tourist information services.

“The iStation deal is our first to secure the real estate on which we will deploy our New Zealand Webphone network, which we will own and operate. iStation gives us access to a well respected and established national kiosk network as well as potential new sites.

We are also negotiating with other real estate owners in New Zealand with more deals expected to be finalised in the near future.” pieNETWORKS’ Managing Director, Campbell Smith said.
