

Case Studies – Rural and Remote Networks

80 Mile Beach Caravan Park

The Customer

A family owned, remotely located Caravan Park in the North West of Western Australia.

The Need

Provide guests with pre-paid or coin access on a casual basis to E-Mail access and Internet banking.

A device that will function satisfactorily on low-end telecommunications network (in this case Radio Link).

A reliable hardware solution that will not be adversely affected by frequent power surges or disruption.

The Solution

pieNETWORKS provided a turnkey solution based on (for budget considerations) a low spec, refurbished 1st generation pieLINK.

Results

After more than 3 years of operation, fantastic customer satisfaction and outstanding return on investment.

Client Feedback

Col Lewis was delighted to be contacted by pieNETWORKS for a testimonial after his pieLINK had been in operation for over 12 months.

With a grin he declared “Let’s say its been one of our better decisions”.
