

Pay-for-Use Internet Kiosk

The Pay-for-Use Internet Kiosk is the ideal device for providing easy-to-use, hassle-free internet access to customers. A field-tested ruggedized cabinet, industrial-grade hardware and robust software provides the required reliability, crucial for the success of a public device. The service includes a 24x7 Network Operations Centre (NOC) that remotely monitors the device and proactively corrects any problems that might arise in your situation.

pieNETWORKS Internet Kiosk allows you to:

- Provide broadband internet access
- Provide Hotspot wireless access
- Provide a combination of usage modes, namely coin, credit cards, scratch cards or free-to-use.
- Provide Digital Media to advertisers
- Remotely manage your network of devices
- Extract detailed statistics and reports of usage

| What you get: | |
|--|---|
| Feature | Benefit |
| Pay-per-use broadband Internet access; Scratch card, credit card or coin access | Full flexibility to accommodate the habits and behaviour of target customers |
| Wireless Hotspot | Extra service and new revenue stream from users who can access the Internet using their laptops or PDAs |
| Digital Media Advertising | Another new revenue stream, with the worldwide growth of digital media advertising. |
| White list and black list filtering options | Avoid nasty surprises and ramifications of users accessing inappropriate or sensitive material. |
| Centralised NOC | Remote monitoring of the service ensures rapid response to faults Centralised control of White and Black lists ensures access policies are always up to date and maintained. |
| Remote software upgrade | pieNETWORKS ongoing R&D program creates regular upgrades as the Internet evolves. |
| Worldwide Onsite Technical Support | Our extensive network of support agents, provided by our worldwide support partner Getronics, quickly rectify any faults that cannot be resolved on-line, limiting service downtime to a minimum. |
| Online real-time reports | Our secure web-based MIS, provides a series of real-time usage reports on a selected device or group of devices. |
